

Southampton Methodist Circuit Church car park locations

The table below shows the locations for the church car parks for Sat Nav purposes. Using the postcode alone may not give the required location as postcodes often cover many premises on a road. “What 3 Words” is a free download to a mobile phone from your app store.

Entering the “3 words” code to the app gives you three locations – one for the code you have entered and two for close misspellings – (these will be elsewhere in the world) so you can check you have entered the correct code.

Once you have done this, the W3W app should allow you to send the location directly to your navigation app, which will open so you can get directions in the normal way. For reference (or in case you cannot get W3W to work), the OS grid references and detailed latitude/longitude co-ordinates are also supplied. W3W sends the lat/long co-ordinates shown to your navigation app. If W3W won’t “speak” to it, you can enter directly (you may need a “,” after 1st number).
